

FAASTeam presents:

# **Transition Training - Stepping up to High Performance/Complex Aircraft**

Are you ready to move up to high performance and/or complex airplanes? This milestone is one not unlike the first solo; it is one that every pilot remembers for life. High performance and complex airplanes offer excitement, performance and cross-country practicality not available in lesser machines. It is a step, however, that must be taken with proper training and skill development. Come and learn as this highly-experienced pilot and flight instructor lays out the path to success in learning and utilizing high-performance general aviation aircraft. Here you will learn:

- Why not all complex aircraft are high performance, and vice versa
- What is required to qualify as Pilot-in-Command of these advanced machines
- What to expect in training for your high-performance and/or complex endorsements
- What you will find different--starting from the first takeoff--when you first pilot a high-performance aircraft
- The enhanced value of checklist discipline when piloting these aircraft
- Human factors associated with high-performance aircraft
- Common errors in flight planning and execution for pilots new to faster, more powerful machines

## Event Details

**Thu, Jul 14, 2016 - 19:00 PDT**

**Trade Winds Aviation / Reid-Hillview Airport**

2500 Cunningham Ave.

Terminal Building

San Jose, CA 95148

**Contact: Greg Hobbs**

**408-729-5100**
